

**Amendments to the Specification:**

Please replace the paragraph beginning on pg. 21, l. 15 with the following amended paragraph:

Further, in some embodiments, one or more of the substrates can be textured such that the substrate contains depressions and elevations. In such instances, a functional material can be deposited onto the textured substrate such that it collects substantially in the elevations ~~depressions~~ of the substrate, such as shown in Fig. 4. Besides the above-mentioned techniques of deposition, other techniques can also be utilized. For instance, some other known techniques for depositing a functional material onto a substrate can include, but are not limited to, electrostatic, xerographic, printing (e.g., gravure), patterned transfer roll (vacuum or adhesive), and the like.
